Arts integration is exciting – it makes learning more engaging and relevant for learners! Join us for this practical and affirming session examining how to write and teach integrated art units. Attendees will define arts integration, use a checklist for integrating the arts, explore how to use different planning tools to write an arts integrated unit, and learn about different places to source for inspiration for integrated arts lessons and units. Attendees will additionally engage in a hands-on art-making activity, and receive a completed arts integrated unit.
